NOX One

ARAS Security is a distributor of electronic security products and systems. Since 1989, ARAS Security has grown into one of the largest security distributors out there with branches in the Netherlands, Belgium, Denmark and Turkey. One of the security products in its portfolio is NOX Systems.

The Challenge

NOX Systems is a high-end security product. High security, high price. ARAS Security's challenge was to adapt NOX Systems so that it met the demands made by small and medium-sized enterprises and the Home Automation segment. This meant the product had to become smaller and more compact, that the price needed to come down and that it needed to become more visually attractive.

The Solution

Over the past three years, ARAS Security has worked hard to make the NOX smaller and more compact. These efforts have resulted in a new product: NOX One. The ideal solution for small and medium-sized installations. To help visualise the solution, ARAS Security opted for the IPPC-10SLB. This is a 10-inch Intel Panel PC with Surround LED Bar; a unique feature on the market. The Surround LED Bar allows ARAS Security to visualise the status of a space, informs people when they need to leave the building and numerous other functions.

IPPC-10SLB

The ProDVX IPPC-10SLB is a Commercial Grade 10.1 inch Intel Panel PC with Power over Ethernet (PoE) and Surround LED Status Light Bar (Full RGB). With its Surround LED Bar it is the ideal solution. This device can be connected through RJ45 LAN, WiFi and Bluetooth. The IPPC-10SLB standard comes with an Intel Atom X5-Z8350 Quad Core CPU and has a projected capacitive touch display and plastic housing. Optional accessories are a 1D/2D Barcode Scanner, NFC Module and Motion Sensor.

The Result

The solution's stand-out feature is the Surround LED Bar. ARAS Security can also use colours to inform the NOX System's user of certain statuses. This is more than just a functionality as it creates enormous added value for the end user when it comes to their product experience. Users can manage all their systems via one screen. This makes buildings safer and more intelligent. The combination of the compact NOX One with IPPC-10SLB with Surround LED Bar makes NOX Systems a unique product on the market.

About ProDVX

PRO DVX

ProDVX develops and produces high-quality and state-of-the-art hardware for digital communication and solutions worldwide.

As specialists, we are pioneering when it comes to developing and producing reliable displays and touchscreens. Hardware you can always depend on. Through our extensive range, we can offer an innovative and durable solution for any form of digital communication, such as digital signage, room signage, wayfinding and access control. You will find our hardware everywhere. And a considered combination of price, advice, service and support makes us accessible to all: partners and end users.

Fair prices mean that our products work for everyone and every project. Contact us for advice if you require a solution for a particular situation or need custom-made products (e.g., OEM/ODM). And afterwards, we will naturally provide all the necessary service and support.

So, our end users are guaranteed reliable hardware for their digital communication.
