## The municipality of Apeldoorn

With almost 200,000 inhabitants, Apeldoorn is one of the largest municipalities in the Netherlands. Approximately 1300 people work for the municipality of Apeldoorn one way or another. The town hall is the heart of this municipality.

## The Challenge

Ultimately, the municipality of Apeldoorn has set the goal of delegating the task of reserving meeting rooms to the employees, so that they don't need to depend on the secretariat to do so. Communication between different departments makes it difficult to reserve and manage meeting rooms and also causes misunderstandings. Is the space occupied or available at the moment? When can I come in? It was necessary to find a solution to automate the process.

## The Solution

The municipality of Apeldoorn uses Reflex RoomManager's booking system to reserve and manage meeting rooms. The software is linked to our APPC-10DSKPL, an Android SOC Touch Display with LED lights on both sides of the screen. Employees and visitors will find an APPC-10DSKPL at the entrance of every meeting room.

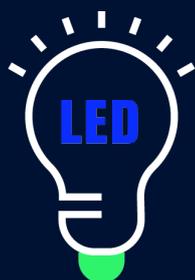

### **APPC-10DSKPL**

The ProDVX APPC-10DSKPL is an Android Panel PC with a 10.1" Touch Display, Power over Ethernet (PoE) and 2 sided LED Bar (RGB) to emphasize the displayed content such as room availability. The ProDVX APPC-10DSKPL comes with Android 6 (or optional Linux). This device can be connected through RJ45 LAN, WiFi, Bluetooth and contains a standard option to schedule reboot or shut down. This Android SOC Touch Display has a projected capacitive touch display and plastic housing. Optional accessories for the Pogo Pins are a 1D/2D Barcode Scanner, NFC Module, Motion Sensor or VESA mounting brackets.

## The Result

The process of reserving a room in Apeldoorn has been automated thanks to the combination of Reflex RoomManager and our APPC-10DSKPL display. In addition, people have more flexibility, because a staff member can instantly check whether the meeting room is available and at what time, and book it on the spot.

## About ProDVX

# PRO DVX

ProDVX develops and produces high-quality and state-of-the-art hardware for digital communication and solutions worldwide.

As specialists, we are pioneering when it comes to developing and producing reliable displays and touchscreens. Hardware you can always depend on. Through our extensive range, we can offer an innovative and durable solution for any form of digital communication, such as digital signage, room signage, wayfinding and access control. You will find our hardware everywhere. And a considered combination of price, advice, service and support makes us accessible to all: partners and end users.

Fair prices mean that our products work for everyone and every project. Contact us for advice if you require a solution for a particular situation or need custom-made products (e.g., OEM/ODM). And afterwards, we will naturally provide all the necessary service and support.

So, our end users are guaranteed reliable hardware for their digital communication.

## About Apeldoorn

Apeldoorn is a city and municipality in the province of Gelderland in the centre of the Netherlands. With over 95.000 people working in the municipality, Apeldoorn is an important employment centres.

Apeldoorn has a strong focus on art and culture, much of which can be seen in the city's Cultuurkwartier (cultural quarter) near the city centre, where many of Apeldoorn's music, dance, theatre and film performances and exhibitions are held.
