Meet NFS Technology

Official certified software partner of ProDVX

NFS Technology is an international software and services company with HQ in UK, in business for over 20 years, with over 2000 happy customers.

The Rendezvous Workspace solution offers powerful functionality to manage space efficiently, from meeting rooms to desks, lockers and car parking, improving space utilisation and delivering a mobile ready, intuitive user experience, critical for today's agile workforce..

The NFS Rendezvous Events solution transforms venue management, from automating the enquiry handling and sales process (integrated with the Microsoft Dynamics CRM), to diary management, billing and all aspects of venue operations. Rendezvous Dashboards/Analytics in conjunction with a rich API, ensure integration to a range of venue technologies; digital signage, ERP, web bookings and event registration for hybrid events.

Solution: Roombooking

Manage your roombookings with Rendezvous

In today's hybrid workplace, people come and go on different schedules. To keep everyone working efficiently and productively, it's essential to integrate room scheduling into your workplace design

Rendezvous / ProDVX Integration

NFS has worked with ProDVX to develop a native touch panel application that supports the entire meeting room management process, with features such as: room availability indicators, smart booking, check in/out, and even no-show tracking – which can help organizations better manage their meeting rooms by reverting rooms back to available for no-shows. Rendezvous is the platform that connects your staff, colleagues and visitors to deliver a perfect meeting and workplace experience.

Details of the joint solution

NFS Rendezvous Turn-Key Solution Bundle

The Rendezvous ecosystem bring together all elements of the new digital workplace, from meeting room management to dealing with Visitors and Services like catering. In conjunction with ProDVX, we are able to offer clients the room panels, way finding displays and related devices to create a perfect meeting experience, from booking the room or desk to check in.

ProDVX and NFS have created complete hardware/software bundles that include 7" or 10" room panels, in either black or white, including an integrated lightbar and mounting bracket. And the ProDVX room panels arrive easy to deploy.

Why NFS Technology choses ProDVX

ProDVX Meeting Room Technology

ProDVX APPC-10SLB 10-inch room panels arrive out-of-the-box running the NFS Rendezvous meeting room application which offers an affordable solution for many companies seeking better display technology, without any compromise in functionality or security. And it goes without saying that ProDVX offers reliable hardware, so you can rest assured that your investment in NFS and ProDVX will provide the best user experience and return-on-investment for years to come. But this is integration is more than a panel solution. It also includes integration with wayfinding displays like ProDVX APPC-32X touch display.
