# Meet Nordicscreen

**Official certified software partner of  
ProDVX**

NordicScreen is a Danish software company specializing in software for digital signage solutions.

At NordicScreen, the experience of the user is considered in every decision in order to create user-friendly and intuitive software solutions that provide the customer with smart and valuable tools for communication.

NordicScreen's main focus is to create digital signage solutions that simplify the process of creating adapted, relevant and timely communication. All NordicScreen solutions can be remotely controlled, so no matter where your display is placed, you can manage it from your computer.

# Solution

## Easy Management of Meeting Rooms with NordicScreen

- Meeting Room Displays, you might be thinking of the big screen inside the meeting room, but actually, this is about a 10” ProDVX touchscreen mounted outside each meeting room. When combined with the NordicScreen software Q-Cal Meeting Room Display, you can see exactly what events take place in the individual room throughout the day.
- Q-Cal can be used as a booking system in itself or you can integrate it with your existing calendar system e.g. Office 365. With the two-way integration in place, your meeting room displays will automatically be updated based on events in your calendar. So, when you book a meeting room, it will automatically appear as part of the agenda on the screen outside the room you have booked.

## Meeting Room/Digital Signage by NordicScreen

Combining your meeting room display solution with Q-Play Digital Signage, you can put up digital signs displaying overviews of the day's events or an ActiveMap of your meeting facilities.

The overview makes it easy for everyone to see when and where an event or meeting is taking place. The ActiveMap will serve as a wayfinding method, displaying the layout of your meeting rooms, while also making it easy to see, which rooms are occupied.

# Benefits of choosing NordicScreen & ProDVX

## The joint solution in five bullet points

- ✓ At NordicScreen, user experience is considered in every decision in order to create user-friendly and intuitive solutions that provide the customer with smart and valuable tools for their communication.
- ✓ The Q-Cal Meeting Room Display software offers a customer-centric solution that provides an effective way of managing meeting facilities.
- ✓ The durability of ProDVX meeting room displays in combination with NordicScreen's software ensures a low-maintenance solution that is aimed at benefitting the customer and making their life easier.
- ✓ Reliable hardware performance with an extremely low RMA rate.
- ✓ Smart hardware features that improve essential features of the digital solution.

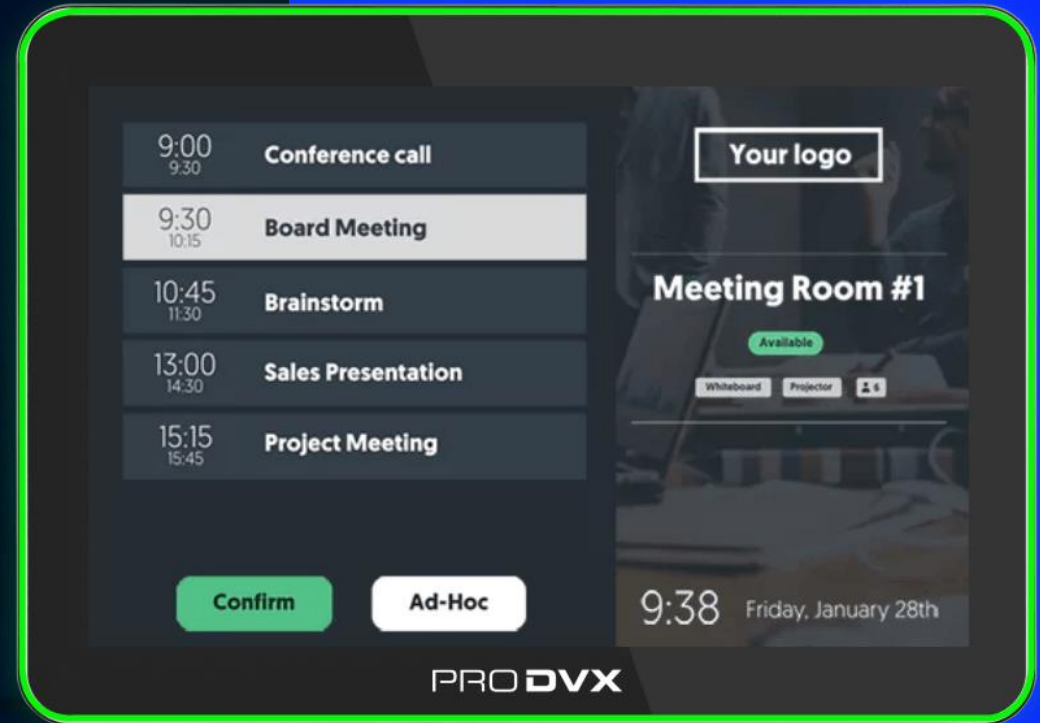

# Details of the joint solution

## Meeting room displays by NordicScreen

If you use ProDVX's APPC-10SLB screens, which are a 10" Android-based Panel PC, the LED edge will make it easy to spot available meeting rooms just aim for the green lights. By confirming your meeting directly on the screen, when your meeting starts, the LED will switch to red, letting everyone know, that the room is occupied.

If the meeting is not confirmed after a set time e.g. 15 minutes, the booking of the room will automatically be canceled. The calendar integration makes sure the room immediately become available for booking in the calendar, thereby minimizing no-show meetings.

If you need a meeting room for your ad hoc meeting, just go to a room with a green LED edge and press the ad hoc booking button on the screen. The edge will turn red and your calendar will update automatically so no one books the meeting room, while you are using it.

## Digital signage made easy by NordicScreen

The two-way calendar integration makes sure that all meetings are listed and removed automatically from the overview list. Likewise, the colors of the ActiveMap will automatically change whenever a meeting is confirmed or ended on the meeting room display. Booking of ad hoc meetings will automatically show up on the map making sure, that no one interrupts your meeting thinking the room is available.

All that information can of course be combined with other things like videos, images, and dashboards. And, the intuitive and user-friendly online platform ensure that you can create your own visual expression without the need for developers or expensive consultants.

The digital signage screen displays the following information:

- LOGO** (top left)
- Wednesday the 17th of June 13:24** (top center)
- Weather forecast:**
  - Today: 11.0°C
  - Tomorrow: 10.0°C
  - Saturday: 5.0°C
  - Sunday: 9.0°C
- Aktivitetsoversigt** (Activity Overview) table:

Tid	Aktivitet	Sted
11:00 - 16:00	Brainstorm - New Website	Meeting Room 1
11:00 - 14:00	Sales	Meeting Room 4
12:00 - 17:00	Marketing	Meeting Room 3
15:00 - 17:00	Ad-Hoc	Meeting Room 4
- 3D Floor Plan Map:** A 3D isometric view of a meeting room layout with colored markers indicating meeting locations.
- LA Times** news snippet (bottom):
