Solution

Manage your digital signage

With our NeuroomNet software solution media technology and building control can now be realized even more easily.

Via NeuroomNet all your devices can communicate with each other so that you can conveniently control them from one single device. It contains device monitoring and logs, media control with individual dashboards, time schedules, visual scripting, digital signage and much more!

Thanks to a simple user interface and the wide range of features the possibilities are endless. Audiovisual media technology, digital signage and building automation can be seamlessly connected for a better visitor experience. Smart switching times and efficient device control save energy for a sustainable day to day operation.

Certified hardware

APPC-10SLB

✅ 10.1" Android Panel PC

✅ Power-over-Ethernet+

✅ Surround LED Bar

APPC-32X

✅ 31.5" Android Panel PC

Solve your problems with inSynergie and ProDVX

The problems inSynergie solves

All of the media technology and the many devices in smart buildings and media installations need to be configured, switched and monitored. That can be very time consuming and expensive.

End customers want to control digital showrooms and exhibitions as a unified system but the different systems often do not speak the same language.

Smart building by inSynergie

NeuroomNet speaks all system languages, automates and centralizes technologies in just one easy-to-use system.
The smart building is never finished. The very fact that a building is smart results in new data and insights that can in turn be implemented in improvements for more productivity or a better visitor experience.
NeuroomNet supports this process with its simple operation and yet wide range of functions.
