MVI AudioVisual
conference automation

The ultimate flexible UI for conferencing applications

Discover the joint solution with ProDVX hardware and MVI software

The new formal meeting experience

Experience a new level of conferencing excellence with the seamless integration of EasyConf Control and EasyConf DelegateUI software into ProDVX electronic nameplates and touch panels. This powerful technology partnership enables participants to log in effortlessly via NFC or pin code, make speaking requests, and cast votes seamlessly using the touch panel right in front of them.

Meanwhile, the software keeps delegates informed in real-time through ProDVX electronic nameplates, displaying updated statuses. This partnership guarantees a streamlined and intuitive conferencing experience, where advanced technology meets unparalleled ease of use. Join us in redefining the future of formal meetings.

Electronic nameplates

EasyConf DelegateUI revolutionizes formal meetings by replacing manual, printed nameplates with dynamic, automated electronic nameplates that showcase participants full names and party logos.

The electronic nameplates keep delegates updated by displaying microphone status, live speech timer and voting results. DelegateUI has been proven to adapt to active meetings, seat changes, and various group configurations, offering unmatched design flexibility and the ability to present any information. MVI's software is a great match with the ProDVX UW-24 PoE and is perfect for crystal clear name displaying.

KEY BENEFITS

- Full name displaying in any color , logos and photos
- Live speech timer
- Microphone status
- Voting results

ProDVX touch panel PCs

DelegateUI can be seamlessly integrated as an app on ProDVX touch panels, such as the ProDVX APPC-10SLBe. It enables smooth navigation through meeting videos, details, active speaker lists, request lists, speech times, and voting options. The software's flexibility allows for personalized permissions and rights for each participant.

Versatile and adaptable, the touch panel can be implemented in various settings, from large council chambers to small formal meeting rooms equipped with ceiling microphones. DelegateUI on the ProDVX panel ensures an unparalleled conferencing experience, no matter the environment.

KEY BENEFITS

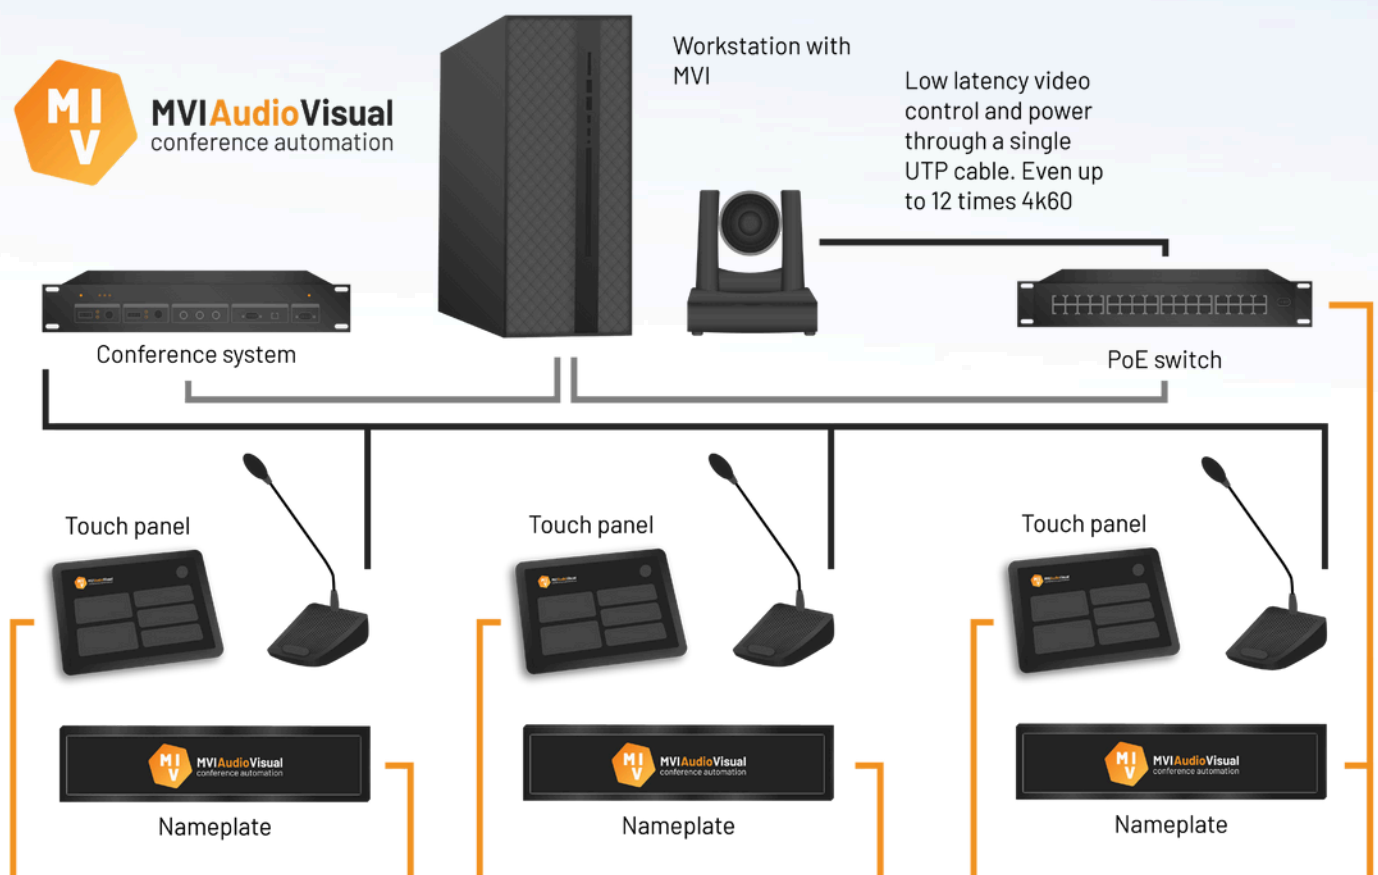

- Navigate easily by touch
- Log in with NFC or pin code
- Control speech time
- Microphone management

About ProDVX

ProDVX specializes in developing and producing high-quality, state-of-the-art hardware for digital communication solutions worldwide. Their reliable displays and touch panels are trusted for a wide range of applications, including digital signage, room signage, wayfinding, and access control. With an extensive product range and a commitment to fair pricing, they offer innovative and durable display solutions that meet the needs of both partners and end users. ProDVX ensures excellent service and support, delivering dependable hardware for any digital communication project.

The setup of ProDVX touch panels and nameplates, powered by MVI Audiovisuals software, in a formal meeting environment can be configured as demonstrated in the product diagram below.
