We are ProDVX

ProDVX develops and produces high-quality and state-of-the-art displays, touchscreens, Panel PCs and box PCs used for digital communication worldwide.

As specialists, we are at the forefront when it comes to developing and manufacturing reliable hardware for commercial use. Hardware you can always rely on. Thanks to our extensive range, we can offer an innovative and sustainable solution for any form of digital communication, such as: digital signage, room signage, signage, kiosks and access control. You will find our hardware everywhere. And a thoughtful combination of price, advice, service and support makes us accessible to everyone: partners and end users.

Our products work for everyone and every project, 24/7. Its size range from 7 to 37 inches. Contact us for advice if you are looking for a solution for a specific situation or need for customized products (e.g., OEM/ODM).

And then of course we provide all the necessary service and support with our in-house support department.

In this way, our customers are assured of reliable hardware for their digital communication. Get to know us by reading about the solutions that our hardware is used for in your industry, how we specialize in it and the smart hardware features we provide for each solution.

ProDVX | Always On
What’s new

We’ve got some exciting new things to show you

We’ve been busy this year to bring you some exciting new products. First of all, the long-awaited APPC-10SLBe is here! This high-performance Android Panel PC runs on Android 11 and comes with GMS. It opens up a world of possibilities with the inclusion of the Google Play Store, and is highly secure through Google Play Protect.

Another novelty within our lineup of Android-powered devices are the new APPC-12XP and APPC-13XP, which feature a new panel. This boosts the brightness of the APPC-12XP all the way up to 600 cd/m², while the APPC-13XP contains brightness of up to 350 cd/m². Next up is the all-new IPPC-22-6200. This 22-inch Intel Panel PC features a powerful Intel i5 processor that makes it a perfect display for self-service kiosk applications.

Lastly, there are two new additions to our range of accessories. These come in the form of our Flush Mount 7 inch and our Stainless Steel Housing 10 inch. The Flush Mount 7 inch allows you to place your device within a drywall for both protection and a smooth look. The 10 inch Stainless Steel Housing provides solid protection for your 10 inch devices.
**Product Management Tools**
ProDVX is proud to announce the next step in our path toward a complete solution for (remote) display management. The launch of our all-new flagship device, the APPC-10SLBe, which is our very first GMS-enabled device, has opened the road towards even more possibilities. In fact, the possibilities seem endless now.

Last year, we announced the introduction of our display management tool, ProMGR. Unfortunately, ProMGR has been slightly delayed, but it is not the only way for you to manage your ProDVX devices. Several other options exist to help you out. We have tested, implemented and will always be implementing a plethora of possibilities for managing your displays in your customer’s installations.

**Support of Secure Google Play Store**
The recent introduction of the APPC-10LSBe brings you a new important feature for device management in the form of the Secure Google Play Store. Here you can find many solutions for remote management in the form of EMM and MDM tools. The tools can be used for secure app deployment to devices in the field, all from one central hub.

**Support of ADB over Ethernet**
ProDVX Android-based products support several methods of controlling them. Amongst others, the Android Debug Bridge (ADB) offers a basic command-line tool for your projects. It is capable of facilitating a variety of device actions, such as installing or debugging an app. It provides you with a tool that can be used to run various commands on your ProDVX hardware. ADB over Ethernet provides you with an easy and efficient manner of deploying basic commands.

**Software Development Kit**
In addition, software developers can use our SDK to manage their apps on our devices. This provides them with a set of tools to use when developing applications meant to be operated on ProDVX devices.

**ProMGR, the ProDVX MDM software tool**
Next to the above-mentioned methods, we are working on our very own MDM tool called ProMGR. This will be a basic cloud-based remote management tool that allows you to deploy apps securely. Considering the current developments, we are scheduling the release of ProMGR for the second half of 2023.
Now more than ever, delivering a smooth and comfortable experience is important. No matter whether you are in an office, a retail store, hospital or at a bar, you want to provide the best possible experience for your customer, guest or visitor. Reliable hardware is a part of that equation. The ProDVX APPC-series is designed to guarantee business continuity by using high-quality commercial grade components for increased performance and durability. This means your digital solution is able to run continuously without the hassle of malfunctioning hardware.

The APPC-series comes with the Android operating system by default. This operating system offers reliability, and is easy to use for both employees and customers. When it comes to security, Android offers a safe digital environment with little to no security issues. And as it is an open-source OS, integrations can be easily facilitated.

Our Android Panel PCs are used for a large variety of applications. From meeting room signage in corporate offices or POS systems in retail stores to queue management in hospitals or as a self-service kiosk at a cafe. The APPC-series comes in different sizes, ranging from 7 to 32 inch. This means there is always a device that’s the right size for your solution.

Would you like to know if our line-up of Android Panel PCs supports your solution? Get in touch with us to discover how we can let the APPC-series work for you.

**Features**

- Android 8.1, Android 9, Android 11, Linux (optional)
- High quality and durable PCAP touch
- Available sizes: 7, 10, 12, 13, 15, 22, 24, 27 and 32 inch
- Optional: integrated LED status lights (full RGB)
- Commercial grade continuous usage (24/7)
- Several connectivity options such as LAN, Power over Ethernet, Wi-Fi, Bluetooth and Pogo pin connectors for accessories

NEW

APPC-10SLBe

Designed for enterprise solutions.

Unlimited possibilities

Accurate & easy to clean touch functionality
Easy content deployment
Power over Ethernet+
Full RGB surround LED bar
Double the RAM triple the performance
Secured with Google Play Protect

Room booking with the ProDVX APPC-10SLBe.
The ProDVX IPPC-series consists of a line-up of 7 different Panel PCs, all running on the Windows 10 IoT operating system (Linux is optional). Using Windows as the operating system for your digital signage setup brings several benefits. It is one of the most well-known operating systems, meaning most people will have some degree of familiarity with it.

Another important advantage of Windows as an operating system is that it easily integrates into existing IT systems, meaning implementation of Intel Panel PCs does not require a complex overhaul of your current digital environment.

To ensure there is always an Intel Panel PC perfect for your solution, the IPPC-series comes in different sizes, ranging from 10 to 32 inch. Our 10-inch Intel Panel PC is perfect for applications such as room booking, while the 15 and 22-inch variants are perfect for self-service kiosks. Larger devices like the 24, 27 and 32-inch devices are perfect for solutions that require larger displays such as wayfinding or queuing systems.

Need advice for your specific situation? Reach out to us!

**IPPC-series | Intel SOC**

**Touch Displays**

Intel(ligent) devices to satisfy your needs

---

**Features**

- Windows 10 IoT, Linux (optional)
- High quality and durable PCAP touch
- Available sizes: 10, 15, 22, 24, 27 and 32 inch.
- Optional: integrated LED status lights (full RGB)
- Commercial grade continuous usage (24/7)
- Several connectivity options such as LAN, Power over Ethernet, Wi-Fi, Bluetooth and Pogo pin connectors for accessories
### Panel
- **Panel Size & Type**
  - IPPC-10SLB: 10.1” TFT LCD IPS
  - IPPC-15-6000: 15.6” TFT LCD IPS
  - IPPC-22-6000: 21.5” TFT LCD IPS
  - IPPC-22-6200: 21.5” TFT LCD IPS
  - IPPC-24: 23.6” TFT LCD IPS
  - IPPC-27: 27” TFT LCD IPS
  - IPPC-32: 31.5” TFT LCD IPS

### Resolution & Aspect Ratio
- 1280 x 800, 16:10 wide

Our product line of UltraWide Signage Displays consists of three different devices, with sizes of 24, 28 and 32-inch. Without doubt the most unique feature of these devices is their form. Their aspect ratio of 16:9 for the UW-24 & UW-28 and 32:9 for the UW-37 result in a uniquely wide display. This particular design allows our UltraWide Signage Displays to be used in a variety of ways that use their form to the fullest extent.

Our UW line can be used for many different solutions, but it is most often used for digital signage and wayfinding purposes. For example, you can mount these devices to shelves, ceilings, columns and walls, to show advertisements in retail stores. Our UltraWide Signage Displays can be used either horizontally or vertically, giving you lots of opportunities to create content to engage your customers. And with brightness up to 700cd/m², you can be sure that these devices will stand out to your audience.

Contact us for more information on how our UltraWide Signage Displays can help your solution.

Features

- Android 8.1
- Available sizes: 24, 28 and 37 inch
- Commercial grade continuous usage (24/7)
- Several connectivity options such as LAN, Wi-Fi and Bluetooth
- Long-life-availability of products and parts (3 to 5 years)

Signage Displays

The ProDVX line of Signage Displays consists of professionally designed and manufactured devices that come with HDMI input and integrated Full HD Media Player. These devices are perfect for one-way communication in any setting. There is no limit to the number of solutions our Signage Displays can be used for. From showing advertisements in retail stores or signalling which queue number is up next in a quick-service restaurant, to providing general information in large corporate offices or hospitals. Their Auto Video & Loop function makes them especially useful for playing videos that need to be continuously repeated, such as advertisements, safety instructions or educational videos.

Features

- HDMI-in and Integrated Full HD Media Player
- Available sizes: 10, 14, 15, 18 and 22 inch
- Commercial grade continuous usage (24/7)
- Long-life-availability of products and parts (up to 5 years)

The range of reliable ProDVX Touch Monitor Displays consists of 4 touch displays, ranging from 7 to 22 inch. These cost-effective devices are designed for continuous usage and offer improved interaction with the user-friendly 10-point PCAP touch functionality.

In addition, the TMP-series features several pogo pin ports that allow for a range of interactive accessories to be attached. These accessories include our NFC module, barcode scanner and camera, which enable you to add a host of options to boost interaction.

These features make our touch displays suitable for a wide range of solutions that require interaction such as room booking, self-service kiosks, wayfinding or queuing.

Feel free to reach out to us to see how we can make our Touch Monitor Displays work for you.

**Features**

- High quality and durable PCAP touch
- Available sizes: 7, 10, 15 and 22 inch
- Commercial grade continuous usage (24/7)
- Several connectivity options such as LAN, Wi-Fi, Bluetooth and POGO ports for accessories
- Long-life-availability of products and parts (up to 5 years)

Box PCs

Power comes in a box

The ProDVX Box PC line consists of two commercial grade digital signage players that are designed to facilitate efficient deployment of content to displays or monitors. Various applications such as digital signage, wayfinding and many others all benefit from using Box PCs. Both of our Android Box PCs run on Android 9 and offer many connectivity options such as USB-C, USB 2.0, USB 3.0, HDMI-in, HDMI-out, and many more. One of them even offers Power over Ethernet connection.

Our Box PCs contain a powerful chipset, graphic processor and system memory that are sure to make an impact. In addition, they support many different types of media and support resolution of up to 4K. Our Android Box PCs can be used in any market, from retail and corporate to hospitality and healthcare. With our devices you can be sure that you can deliver an optimal customer experience.

For any questions regarding the possibilities for your solution, feel free to get in touch.

Features

- Several connectivity options such as Power over Ethernet, Wi-Fi and RS232
- Android 9
- Commercial grade continuous usage (24/7)
- Long-life availability of products and parts (3 to 5 years)
Discover our accessories

Our range of accessories are specifically designed to increase the user experience and will make installing your product easier than ever. Mount your device in the blink of an eye using the different ProDVX mounts. Or enhance your Panel PC with one of our modules to open up a world of possibilities.
Designed to perform
Always On.

Reliability has a name. Years of development on our leading range ensure a superior and stable performance. Always at the ready. Always continuity of your business processes 24/7.

PRODVX.COM
Where to use our products

Find us in any market

ProDVX hardware can be used in any market. At the same time, being an expert means having a focus. That's why we focus on five key markets: corporate, retail, hospitality & events, healthcare and education.

I love ProDVX’ personal touch. Their experts are always available for me and quickly answer any question. That’s a big plus for me as a Product Manager.

- Bennie Evers (Copaco)
