**IPPC-10SLB Quick start guide**

**This package contains:**

- Tools necessary but not included

**How to start:**

1. Take contents out of the box, make sure all components are present.
2. Install wall/glass mount or desk stand using manual screw driver, check designated mount/stand manual for instructions.
3. Connect to power via power adapter or PoE+. If using the power adapter, please remove the rubber plug before inserting the power cable if applicable.
4. Connect to Internet through Wi-Fi, PoE+, or LAN.
5. If applicable, install and configure preferred application.

**Quick connection settings**

Step 1: Plug in power cable to turn on display. To connect to Wi-Fi, navigate to the bottom toolbar and click the globe icon as seen in the image below.

**Important notice**

Whenever you want to switch between the Wi-Fi connection and ethernet connection, the following procedure can be used:

1. When powering on the device, select Wi-Fi by pressing and holding the volume plus-button.
2. If you would like to switch back to the ethernet connection, make sure the device is powered down. After that, press and hold the volume minus-button while turning on the device to revert back to ethernet.

If the procedure is performed correctly, a notification will be shown stating which connection is now active.

**Optional accessories**

- Barcode scanner
- NFC module
- Camera

**Correct Disposal of this product:**

- This marking indicates that this product should not be disposed of with other (household) waste. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the reseller where the product was purchased. They can take this product for environmentally safe recycling.

**Europe (UK - EU) Declaration of Conformity**

This device complies with the essential requirements of the Radio Equipment Directive (2014/53/EU). The following test methods have been applied in order to prove the presumption of conformity with the essential requirements of the Radio Equipment Directive. This equipment is compliant with Class A of EN 55032. In a residential environment, this equipment may cause radio interference.

**Caution:**

Please note that the clock battery used in this product is not to be used as a power source. Please return the product to a certified repair centre for proper replacement of the battery; battery disposal can be harmful to the environment.

- **Tools necessary but not included:**
  - Pogo pin connector
  - Strain relief

**Storage temperature:**

- Operating temperature: 0 - 40 °C / 32 - 104 °F
- Storage temperature: -10 - 55 °C / -14 - 131 °F
- Relative humidity: 10 - 85% at 40 °C / 104 °F non-condensing
